Send the request to the office of the Publications Manager (permission@arrl.org).

About the Cover

Jacques Audet, VE2AZX, wanted a way to use his Hewlett-Packard Vector Network Analyzer (VNA) at frequencies below 300 kHz, so he built the “Low Frequency Adapter for Your Vector Network Analyzer” shown on the cover. As an added benefit, you can feed the signal from a 1 to 30 MHz signal generator into the Clock Input port of the adapter, and use it as a wideband direct conversion receiver.

In This Issue

Features

3 Bob Zepp: A Low Band, Low Cost, High Performance Antenna — Part 2
 Robert J. Zavrel, Jr, W7SX

10 A Low Frequency Adapter for your Vector Network Analyzer (VNA)
 Jacques Audet, VE2AZX

17 Optimizing Magnetically Coupled Loop Antennas
 John E. Post, KA5GSQ

31 A Selective Robust Weak-Signal UHF Front End
 Silvan Toledo, 4X6IZ

37 SDR: Simplified
 Ray Mack, W5IFS
