Our Cover

These antennas are owned by the father-and-son team of Zbigniew, SP7EWL and Tomasz, SP7UWL. The array was still under construction at the time this photo was taken. The upper array is for 7 and 10 MHz, and was manufactured by Zelga, SP7GXP. The lower array was made by Jurek, SP3GEM, and has three elements for 14 MHz, four elements for 21 MHz, and five elements for 28 MHz. Both antennas can be lowered and raised on the freestanding tower, remotely from the radio room. The top antenna goes up to 21 meters (70 feet) while the lower antenna is 2 meters below at 63 feet.
