

Are You Smarter Than A Technician?

Here's how you play: Politely ask an adult ham if they would be willing to play "Are You Smarter Than A Technician?" by answering one question from the Technician class question pool. Ask them the question and record their call sign and whether they got it correct. Then, bring this sheet back to the Youth Lounge to get another sheet of questions. Each question is worth one point. Good luck!

1. Who is an amateur operator as defined in Part 97?
[A person named in an amateur operator/primary license grant in the FCC ULS database](#)
2. What is one of the basic purposes of the Amateur Radio Service as defined in Part 97?
[To provide a voluntary noncommercial communications service to the public, particularly in times of emergency](#)
3. What classes of US amateur radio licenses may currently be earned by examination?
[Technician, General, Extra](#)
4. Who is a Volunteer Examiner?
[An amateur accredited by one or more VECs who volunteers to administer amateur license exams](#)
5. How long is a CSCE valid for license upgrade purposes?
[365 days](#)
6. How many and what class of Volunteer Examiners are required to administer an Element 2 Technician written exam?
[Three Examiners holding a General Class license or higher](#)
7. Who makes and enforces the rules for the Amateur Radio Service in the United States?
[The Federal Communications Commission](#)
8. What are two of the five fundamental purposes for the Amateur Radio Service?
[To increase the number of trained radio operators and electronics experts, and improve international goodwill](#)
9. What is the definition of an amateur radio station?
[A station in an Amateur Radio Service consisting of the apparatus necessary for carrying on radio communications](#)
10. What is a transmission called that disturbs other communications?
[Harmful interference](#)
11. What is the ITU?
[The International Telecommunication Union](#)
12. What is the purpose of ITU Regions?
[They are used to assist in the management of frequency allocations](#)
13. What system does the FCC use to select new amateur radio call signs?
[Call signs are assigned in sequential order](#)
14. What FCC call sign program might you use to obtain a call sign containing your initials?
[The vanity call sign program](#)
15. How might an amateur radio club obtain a club station call sign?
[By applying through a Club Station Call Sign Administrator](#)
16. Who is eligible to apply for temporary use of a 1-by-1 format Special Event call sign?
[Any FCC-licensed amateur](#)
17. When are you allowed to operate your amateur station in a foreign country?
[When there is a reciprocal operating agreement between the countries](#)
18. Which of the following call signs is a valid US amateur call?
[KB3TMJ](#)

Are You Smarter Than A Technician?

Here's how you play: Politely ask an adult ham if they would be willing to play "Are You Smarter Than A Technician?" by answering one question from the Technician class question pool. Ask them the question and record their call sign and whether they got it correct. Then, bring this sheet back to the ARRL Youth Lounge to get another sheet of questions. Each question is worth one point. Good luck!

19. What letters must be used for the first letter in US amateur call signs?
A, K, N and W
20. What numbers are used in US amateur call signs?
A single digit, 0 through 9
21. What is required before you can control an amateur station in the US?
You must be named in the FCC amateur license database, or be an alien with reciprocal operating authorization
22. Where does a US amateur license allow you to transmit?
From wherever the Amateur Radio Service is regulated by the FCC or where reciprocal agreements are in place
23. Under what conditions are amateur stations allowed to communicate with stations operating in other radio services?
When authorized by the FCC
24. Which frequency is within the 6-meter band?
52.525 MHz
25. Which amateur band are you using when transmitting on 146.52 MHz?
2 meter band
26. Which 70-centimeter frequency is authorized to a Technician class license holder operating in ITU Region 2?
443.350 MHz
27. Which 23 centimeter frequency is authorized to a Technician class license holder operating in ITU Region 2?
1296 MHz
28. What amateur band are you using if you are operating on 223.50 MHz?
1.25 meter band
29. What do the FCC rules mean when an amateur frequency band is said to be available on a secondary basis?
Amateurs may not cause harmful interference to primary users
30. When may a US amateur operator communicate with an amateur in a foreign country?
At any time unless prohibited by either government
31. Which of the following types of communications are not permitted in the Amateur Radio Service?
Communications on a regular basis that could reasonably be furnished alternatively through other radio services
32. Which of the following services are issued an operator station license by the FCC?
Amateur Radio Service
33. Who can become an amateur licensee in the US?
Anyone except a representative of a foreign government
34. What is the minimum age required to hold an amateur license?
There is no minimum age requirement
35. What government agency grants your amateur radio license?
The Federal Communications Commission
36. How soon may you transmit after passing the required examination elements for your first amateur radio license?
As soon as your license grant appears in the FCC's ULS database

Are You Smarter Than A Technician?

Here's how you play: Politely ask an adult ham if they would be willing to play "Are You Smarter Than A Technician?" by answering one question from the Technician class question pool. Ask them the question and record their call sign and whether they got it correct. Then, bring this sheet back to the ARRL Youth Lounge to get another sheet of questions. Each question is worth one point. Good luck!

37. What is the normal term for an amateur station license grant?
10 years
38. What is the grace period during which the FCC will renew an expired 10-year license without re-examination?
2 years
39. What is your responsibility as a station licensee?
Your station must be operated in accordance with the FCC rules
40. When may the FCC revoke or suspend a license if the mailing address of the holder is not current with the FCC?
If mail is returned to the FCC as undeliverable
41. The FCC requires which address to be kept up to date on the Universal Licensing System database?
The station licensee mailing address
42. When are you permitted to continue to transmit if you forget to renew your amateur license and it expires?
Transmitting is not allowed until the license is renewed and appears on the FCC ULS database
43. Why must an Amateur radio operator have a correct name and mailing address on file with the FCC?
To receive mail delivery from the FCC by the United States Postal Service
44. When is an amateur station authorized to transmit information to the general public?
Never
45. When is an amateur station authorized to transmit music?
Amateurs may not transmit music, except as incidental to an authorized rebroadcast of space shuttle communications
46. When is the transmission of codes or ciphers allowed to hide the meaning of a message transmitted by an amateur station?
Only when transmitting control commands to space stations or radio control craft
47. When may an amateur station transmit false or deceptive signals?
Never
48. When may an amateur station transmit unidentified communications?
Only when sent from a space station or to control a model craft
49. What does the term broadcasting mean?
Transmissions intended for reception by the general public, either direct or relayed
50. Which of the following are specifically prohibited in the Amateur Radio Service?
Indecent and obscene language
51. Which of the following one-way communications may not be transmitted in the Amateur Radio Service?
Broadcasts intended for reception by the general public
52. When does the FCC allow an amateur radio station to be used as a method of communication for hire or material compensation?
Only when in accordance with part 97 rules
53. What type of communications are prohibited when using a repeater autopatch?
Calls to your employer requesting directions to a customer's office
54. When may you use your station to tell people about equipment you have for sale?
When you are offering amateur radio equipment for sale or trade on an occasional basis

Are You Smarter Than A Technician?

Here's how you play: Politely ask an adult ham if they would be willing to play "Are You Smarter Than A Technician?" by answering one question from the Technician class question pool. Ask them the question and record their call sign and whether they got it correct. Then, bring this sheet back to the ARRL Youth Lounge to get another sheet of questions. Each question is worth one point. Good luck!

55. What must you transmit to identify your amateur station?
Your call sign
56. What is a transmission called that does not contain a station identification?
Unidentified communications or signals
57. How often must an amateur station transmit the assigned call sign?
Every 10 minutes during communications and at the end of each communication
58. What is an acceptable method of transmitting a repeater station identification?
By phone using the English language.
By video image conforming to applicable standards.
By Morse code at a speed not to exceed 20 words per minutes
All of these answers are correct:
59. What identification is required when two amateur stations end communications?
Each station must transmit its own call sign
60. What is the longest period of time an amateur station can operate without transmitting its call sign?
10 minutes
61. What is a permissible way to identify your station when you are speaking to another amateur operator using a language other than English?
You must identify using the English language
62. How often must you identify using your assigned call sign when operating while using a special event call sign?
Once per hour
63. What is required when using one or more self-assigned indicators with your assigned call sign?
The indicator must not conflict with an indicator specified by FCC rules or with a prefix assigned to another country
64. What is the correct way to identify when visiting a station if you hold a higher class license than that of the station licensee and you are using a frequency not authorized to his class of license?
Send his call sign first, followed by your call sign

When exercising the operating privileges earned by examination upgrade of a license what is meant by use of the indicator "/AG"?
Authorized General
65. What must every amateur station have when transmitting?
A control operator
66. How many amateur operator / primary station licenses may be held by one person?
Only one
67. What minimum class of amateur license must you hold to be a control operator of a repeater station?
Technician
68. Who is responsible for the transmissions from an amateur station?
Control operator
69. When must an amateur station have a control operator?
Whenever the station is transmitting

Are You Smarter Than A Technician?

Here's how you play: Politely ask an adult ham if they would be willing to play "Are You Smarter Than A Technician?" by answering one question from the Technician class question pool. Ask them the question and record their call sign and whether they got it correct. Then, bring this sheet back to the ARRL Youth Lounge to get another sheet of questions. Each question is worth one point. Good luck!

70. What is the control point of an amateur station?
The location at which the control operator function is performed
71. What type of amateur station does not require a control operator to be at the control point?
An automatically controlled station
72. What are the three types of station control permitted and recognized by FCC rule?
Local, remote and automatic control.
73. What type of control is being used on a repeater when the control operator is not present?
Automatic control
74. What type of control is being used when transmitting using a handheld radio?
Local control
75. What type of control is used when the control operator is not at the station location but can still make changes to a transmitter?
Remote control
76. What is the definition of a control operator of an amateur station?
An operator designated by the licensee to be responsible for the station's transmissions to assure compliance with FCC rules
77. Who is responsible for proper operation if you transmit from another amateur's station?
Both of you
78. What operating privileges are allowed when another amateur holding a higher class license is controlling your station?
All privileges allowed by the higher class license
79. What operating privileges are allowed when you are the control operator at the station of another amateur who has a higher class license than yours?
Only the privileges allowed by your license
80. Which of the following is a prohibited amateur radio transmission?
Using amateur radio for conducting business
81. What is the definition of third-party communications?
A message sent between two amateur stations for someone else
82. How many persons are required to be members of a club for a club station license to be issued by the FCC?
At least 4
83. When may you operate your amateur station aboard an aircraft?
Only with the approval of the pilot in command and not using the aircraft's radio equipment
84. When is the FCC allowed to inspect your station equipment and station records?
At any time upon request
85. How might you best keep unauthorized persons from using your amateur station?
Disconnect the power and microphone cables when not using your equipment
86. Why are unlicensed persons in your family not allowed to transmit on your amateur station if you are not there?
They must be licensed before they are allowed to be control operators

Are You Smarter Than A Technician?

Here's how you play: Politely ask an adult ham if they would be willing to play "Are You Smarter Than A Technician?" by answering one question from the Technician class question pool. Ask them the question and record their call sign and whether they got it correct. Then, bring this sheet back to the ARRL Youth Lounge to get another sheet of questions. Each question is worth one point. Good luck!

87. When is it permissible for the control operator of a club station to accept compensation for sending information bulletins or Morse code practice?
When the station makes those transmissions for at least 40 hours per week
88. Which of the following should you do when selecting a frequency on which to transmit?
Listen to determine if the frequency is busy
89. How do you call another station on a repeater if you know the station's call sign?
Say the station's call sign then identify your own station
90. How do you indicate you are looking for any station with which to make contact?
CQ followed by your callsign
91. What should you transmit when responding to a call of CQ?
The other station's callsign followed by your callsign
92. What term describes a brief test transmission that does not include any station identification?
An illegal unidentified transmission
93. What must an amateur do when making a transmission to test equipment or antennas?
Properly identify the station
94. Which of the following is true when making a test transmission?
Station identification is required at least every ten minutes and at the end of every transmission.
95. What is the meaning of the procedural signal "CQ"?
Calling any station
96. Why should you avoid using cute phrases or word combinations to identify your station?
They are not easily understood by some operators
97. What brief statement is often used in place of "CQ" to indicate that you are listening for calls on a repeater?
Say your call sign
98. Why should you use the International Telecommunication Union (ITU) phonetic alphabet when identifying your station?
The words are internationally recognized substitutes for letters
99. What is a band plan?
A voluntary guideline, beyond the divisions established by the FCC for using different operating modes within an amateur band
100. Which of the following statements is true of band plans?
They are voluntary guidelines for efficient use of the radio spectrum
101. Who developed the band plans used by amateur radio operators?
The amateur community
102. Who is in charge of the repeater frequency band plan in your local area?
The recognized frequency coordination body
103. What is the main purpose of repeater coordination?
To reduce interference and promote proper use of spectrum

Are You Smarter Than A Technician?

Here's how you play: Politely ask an adult ham if they would be willing to play "Are You Smarter Than A Technician?" by answering one question from the Technician class question pool. Ask them the question and record their call sign and whether they got it correct. Then, bring this sheet back to the ARRL Youth Lounge to get another sheet of questions. Each question is worth one point. Good luck!

104. Who is accountable if a repeater station inadvertently retransmits communications that violate FCC rules?
The transmitting station
105. Which of these statements is true about legal power levels on the amateur bands?
An amateur must use the minimum transmitter power necessary to carry out the desired communication
106. Which of the bands available to Technician class licensees have mode restricted sub-bands?
The 6-meter, 2-meter, and 1 1/4-meter bands
107. What emission modes are permitted in the restricted sub-band at 50.0-50.1 MHz?
CW only
108. What emission modes are permitted in the restricted sub-band at 144.0-144.1 MHz?
CW only
109. What emission modes are permitted in the restricted portion of the 1 1/4-meter band?
CW and Data
110. What is the proper way to break into a conversation between two stations that are using the frequency?
Say your call sign between their transmissions
111. What is considered to be proper repeater operating practice?
Monitor before transmitting and keep transmissions short.
Identify legally.
Use the minimum amount of transmitter power necessary.
All of these answers are correct:
112. What should you do before responding to another station's call?
Make sure you are operating on a permissible frequency for your license class
113. What rule applies if two amateur stations want to use the same frequency?
No frequency will be assigned for the exclusive use of any station and neither has priority
114. Why is indecent and obscene language prohibited in the Amateur Service?
Because it is offensive to some individuals.
Because young children may intercept amateur communications with readily available receiving equipment.
Because such language is specifically prohibited by FCC rules.
All of these answers are correct:
115. Why should amateur radio operators avoid the use of racial or ethnic slurs when talking to other stations?
It is offensive to some people and reflects a poor public image on all amateur radio operators
116. What should you do if you hear a newly licensed operator that is having trouble with their station?
Contact them and offer to help with the problem
117. Where can an official list be found of prohibited obscene and indecent words that should not be used in amateur radio?
There is no official list of prohibited obscene and indecent words
118. What type of subjects are not prohibited communications while using amateur radio?
Political jokes.
Jokes and stories.
Religious preferences.
All of these answers are correct:

Are You Smarter Than A Technician?

Here's how you play: Politely ask an adult ham if they would be willing to play "Are You Smarter Than A Technician?" by answering one question from the Technician class question pool. Ask them the question and record their call sign and whether they got it correct. Then, bring this sheet back to the ARRL Youth Lounge to get another sheet of questions. Each question is worth one point. Good luck!

119. When circumstances are not specifically covered by FCC rules what general operating standard must be applied to amateur station operation?
[Good engineering and amateur practices](#)
120. What should you do if you receive a report that your transmissions are causing splatter or interference on nearby frequencies?
[Check transmitter for off frequency operation or spurious emissions](#)
121. Who is responsible for taking care of the interference if signals from your transmitter are causing front end overload in your neighbor's television receiver?
[The owner of the television receiver is responsible](#)
122. What is the major cause of telephone interference?
[The telephone was not equipped with adequate interference protection when manufactured.](#)
123. What is the proper course of action if you unintentionally interfere with another station?
[Properly identify your station and move to a different frequency](#)
124. When may you deliberately interfere with another station's communications?
[Never](#)
125. Who has exclusive use of a specific frequency when the FCC has not declared a communication emergency?
[No station has exclusive use of any frequency](#)
126. What effect might a break in a cable television transmission line have on amateur communications?
[TV interference may result when the amateur station is transmitting, or interference may occur to the amateur receiver](#)
127. What is the best way to reduce on the air interference when testing your transmitter?
[Use a dummy load when testing](#)
128. What rules apply to your station when using amateur radio at the request of public service officials or at the scene of an emergency?
[FCC](#)
129. What do RACES and ARES have in common?
[Both organizations provide communications during emergencies](#)
130. What is meant by receiver front-end overload?
[Interference caused by strong signals from a nearby source](#)
131. Electrical current is measured in which of the following units?
[Amperes](#)
132. Electrical Power is measured in which of the following units?
[Watts](#)
133. What is the name for the flow of electrons in an electric circuit?
[Current](#)
134. What is the name of a current that flows only in one direction?
[A direct current](#)
135. What is the standard unit of frequency?
[The Hertz](#)

Are You Smarter Than A Technician?

Here's how you play: Politely ask an adult ham if they would be willing to play "Are You Smarter Than A Technician?" by answering one question from the Technician class question pool. Ask them the question and record their call sign and whether they got it correct. Then, bring this sheet back to the ARRL Youth Lounge to get another sheet of questions. Each question is worth one point. Good luck!

136. How much voltage does an automobile battery usually supply?

About 12 volts

137. What is the basic unit of resistance?

The ohm

138. What is the name of a current that reverses direction on a regular basis?

An alternating current

139. Which of the following is a good electrical conductor?

Copper

140. Which of the following is a good electrical insulator?

Glass

141. What is the term used to describe opposition to current flow in ordinary conductors such as wires?

Resistance

142. What instrument is used to measure the flow of current in an electrical circuit?

Ammeter

143. What instrument is used to measure Electromotive Force (EMF) between two points such as the poles of a battery?

Voltmeter

144. What is the name for the distance a radio wave travels during one complete cycle?

Wavelength

145. What term describes the number of times that an alternating current flows back and forth per second?

Frequency

146. What does 60 hertz (Hz) mean?

60 cycles per second

147. Electromagnetic waves that oscillate more than 20,000 times per second as they travel through space are generally referred to as what?

Radio waves

148. How fast does a radio wave travel through space?

At the speed of light

149. How does the wavelength of a radio wave relate to its frequency?

The wavelength gets shorter as the frequency increases

150. What is the formula for converting frequency to wavelength in meters?

Wavelength in meters equals 300 divided by frequency in megahertz

151. What are sound waves in the range between 300 and 3000 Hertz called?

Voice frequencies

152. What property of a radio wave is often used to identify the different bands amateur radio operators use?

The physical length of the wave

153. What is the frequency range of the 2 meter band in the United States?

144 to 148 MHz

Are You Smarter Than A Technician?

Here's how you play: Politely ask an adult ham if they would be willing to play "Are You Smarter Than A Technician?" by answering one question from the Technician class question pool. Ask them the question and record their call sign and whether they got it correct. Then, bring this sheet back to the ARRL Youth Lounge to get another sheet of questions. Each question is worth one point. Good luck!

154. What is the frequency range of the 6 meter band in the United States?

50 to 54 MHz

155. What is the frequency range of the 70 centimeter band in the United States?

420 to 450 MHz

156. What is used to convert radio signals into sounds we can hear?

Receiver

157. What is used to convert sounds from our voice into radio signals?

Transmitter

158. What two devices are combined into one unit in a transceiver?

Receiver, transmitter

159. What device is used to convert the alternating current from a wall outlet into low-voltage direct current?

Power Supply

160. What device is used to increase the output of a 10 watt radio to 100 watts?

Amplifier

161. Which of the battery types listed below offers the longest life when used with a hand-held radio, assuming each battery is the same physical size?

Lithium-ion

162. What is the nominal voltage per cell of a fully charged nickel-cadmium battery?

1.2 volts

163. What battery type on this list is not designed to be re-charged?

Carbon-zinc

164. What is required to keep rechargeable batteries in good condition and ready for emergencies?

They must be inspected for physical damage and replaced if necessary.

They should be stored in a cool and dry location.

They must be given a maintenance recharge at least every 6 months.

All of these answers are correct:

165. What is the best way to get the most amount of energy from a battery?

Draw current from the battery at the slowest rate needed

166. What formula is used to calculate current in a circuit?

Current (I) equals voltage (E) divided by resistance (R)

167. What formula is used to calculate voltage in a circuit?

Voltage (E) equals current (I) multiplied by resistance (R)

168. What formula is used to calculate resistance in a circuit?

Resistance (R) equals voltage (E) divided by current (I)

169. What is the resistance of a circuit when a current of 3 amperes flows through a resistor connected to 90 volts?

30 ohms

Are You Smarter Than A Technician?

Here's how you play: Politely ask an adult ham if they would be willing to play "Are You Smarter Than A Technician?" by answering one question from the Technician class question pool. Ask them the question and record their call sign and whether they got it correct. Then, bring this sheet back to the ARRL Youth Lounge to get another sheet of questions. Each question is worth one point. Good luck!

170. What is the resistance in a circuit where the applied voltage is 12 volts and the current flow is 1.5 amperes?

8 ohms

171. What is the current flow in a circuit with an applied voltage of 120 volts and a resistance of 80 ohms?

1.5 amperes

172. What is the voltage across the resistor if a current of 0.5 amperes flows through a 2 ohm resistor?

1 volt

173. What is the voltage across the resistor if a current of 1 ampere flows through a 10 ohm resistor?

10 volts

174. What is the voltage across the resistor if a current of 2 amperes flows through a 10 ohm resistor?

20 volts

175. What is the current flowing through a 100 ohm resistor connected across 200 volts?

2 amperes

176. What is the current flowing through a 24 ohm resistor connected across 240 volts?

10 amperes

177. What unit is used to describe electrical power?

Watt

178. What is the formula used to calculate electrical power in a DC circuit?

Power (P) equals voltage (E) multiplied by current (I)

179. How much power is represented by a voltage of 13.8 volts DC and a current of 10 amperes?

138 watts

180. How much power is being used in a circuit when the voltage is 120 volts DC and the current is 2.5 amperes?

300 watts

How can you determine how many watts are being drawn by your transceiver when you are transmitting?

Measure the DC voltage at the transceiver and multiply by the current drawn when you transmit

181. How many amperes are flowing in a circuit when the applied voltage is 120 volts DC and the load is 1200 watts?

10 amperes

182. How many milliamperes is the same as 1.5 amperes?

1500 milliamperes

183. What is another way to specify the frequency of a radio signal that is oscillating at 1,500,000 Hertz?

1500 kHz

184. How many volts are equal to one kilovolt?

one thousand volts

185. How many volts are equal to one microvolt?

one one-millionth of a volt

186. How many watts does a hand-held transceiver put out if the output power is 500 milliwatts?

0.5 watts

Are You Smarter Than A Technician?

Here's how you play: Politely ask an adult ham if they would be willing to play "Are You Smarter Than A Technician?" by answering one question from the Technician class question pool. Ask them the question and record their call sign and whether they got it correct. Then, bring this sheet back to the ARRL Youth Lounge to get another sheet of questions. Each question is worth one point. Good luck!

187. What does a microphone connect to in a basic amateur radio station?

The transmitter

188. Which piece of station equipment converts electrical signals to sound waves?

Speaker

189. What is the term used to describe what happens when a microphone and speaker are too close to each other?

Audio feedback

190. What could you use in place of a regular speaker to help you copy signals in a noisy area?

A set of headphones

191. What is a good reason for using a regulated power supply for communications equipment?

To protect equipment from voltage fluctuations

192. Where must a filter be installed to reduce spurious emissions?

At the transmitter

193. What type of filter should be connected to a TV receiver as the first step in trying to prevent RF overload from a nearby 2-meter transmitter?

Notch filter

What is connected between the transceiver and computer terminal in a packet radio station?

Terminal Node Controller

194. Which of these items is not required for a packet radio station?

Microphone

195. What can be used to connect a radio with a computer for data transmission?

Sound Card

196. What may happen if a transmitter is operated with the microphone gain set too high?

It may cause the signal to become distorted and unreadable

197. What kind of information may a VHF/UHF transceiver be capable of storing in memory?

Transmit and receive operating frequency.

CTCSS tone frequency.

Transmit power level.

All of these answers are correct:

198. What is one way to select a frequency on which to operate?

Use the keypad or VFO knob to enter the correct frequency

199. What is the purpose of the squelch control on a transceiver?

It is used to quiet noise when no signal is being received

200. What is a way to enable quick access to a favorite frequency on your transceiver?

Store the frequency in a memory channel

201. What might you do to improve the situation if the station you are listening to is hard to copy because of ignition noise interference?

Turn on the noise blanker

Are You Smarter Than A Technician?

Here's how you play: Politely ask an adult ham if they would be willing to play "Are You Smarter Than A Technician?" by answering one question from the Technician class question pool. Ask them the question and record their call sign and whether they got it correct. Then, bring this sheet back to the ARRL Youth Lounge to get another sheet of questions. Each question is worth one point. Good luck!

202. What is the purpose of the buttons labeled "up" and "down" on many microphones?
To allow easy frequency or memory selection
203. What is the purpose of the "shift" control found on many VHF/UHF transceivers?
Adjust the offset between transmit and receive frequency
204. What does RIT mean?
Receiver Incremental Tuning
205. What is the purpose of the "step" menu function found on many transceivers?
It sets the tuning rate when changing frequencies
206. What is the purpose of the "function" or "F" key found on many transceivers?
It selects an alternate action for some control buttons
207. What is one purpose of a repeater?
To extend the usable range of mobile and low-power stations
208. What is a courtesy tone?
A tone used to indicate when a transmission is complete
209. Which of the following is the most important information to know before using a repeater?
The repeater input and output frequencies
210. Why should you pause briefly between transmissions when using a repeater?
To listen for anyone wanting to break in
211. What is the most common input/output frequency offset for repeaters in the 2-meter band?
0.6 MHz
212. What is the most common input/output frequency offset for repeaters in the 70-centimeter band?
5.0 MHz
213. What is meant by the terms input and output frequency when referring to repeater operations?
The repeater receives on one frequency and transmits on another
214. What is the meaning of the term simplex operation?
Transmitting and receiving on the same frequency
215. What is a reason to use simplex instead of a repeater?
To avoid tying up the repeater when direct contact is possible
216. How might you find out if you could communicate with a station using simplex instead of a repeater?
Check the repeater input frequency to see if you can hear the other station
217. What is the term for a series of repeaters that can be connected to one another to provide users with a wider coverage?
Linked repeater system
218. What is the main reason repeaters should be approved by the local frequency coordinator before being installed?
Coordination minimizes interference between repeaters and makes the most efficient use of available frequencies
219. Which of the following statements regarding use of repeaters is true?
Access to any repeater may be limited by the repeater owner

Are You Smarter Than A Technician?

Here's how you play: Politely ask an adult ham if they would be willing to play "Are You Smarter Than A Technician?" by answering one question from the Technician class question pool. Ask them the question and record their call sign and whether they got it correct. Then, bring this sheet back to the ARRL Youth Lounge to get another sheet of questions. Each question is worth one point. Good luck!

220. What term is used to describe a repeater when use is restricted to the members of a club or group?
A closed repeater
221. What is meant by fundamental overload in reference to a receiver?
Interference caused by very strong signals from a nearby source
222. Which of the following is NOT a cause of radio frequency interference?
Doppler shift
223. What is the most likely cause of telephone interference from a nearby transmitter?
The transmitter's signals are causing the telephone to act like a radio receiver
224. What is a logical first step when attempting to cure a radio frequency interference problem in a nearby telephone?
Install an RF filter at the telephone
225. What should you do first if someone tells you that your transmissions are interfering with their TV reception?
Make sure that your station is operating properly and that it does not cause interference to your own television
226. Which of the following may be useful in correcting a radio frequency interference problem?
Snap-on ferrite chokes.
Low-pass and high-pass filters.
All of these answers are correct:
227. What should you do if a "Part 15" device in your neighbor's home is causing harmful interference to your amateur station?
Work with your neighbor to identify the offending device.
Politely inform you neighbor about the rules that require him to stop using the device if it causes interference.
Check your station and make sure it meets the standards of good amateur practice.
All of these answers are correct:
228. What could be happening if another operator tells you he is hearing a variable high-pitched whine on the signals from your mobile transmitter?
The power wiring for your radio is picking up noise from the vehicle's electrical system
229. What may be the problem if another operator reports that your SSB signal is very garbled and breaks up?
RF energy may be getting into the microphone circuit and causing feedback
230. What is the proper course of action to take when a neighbor reports that your radio signals are interfering with something in his home?
Check your station and make sure it meets the standards of good amateur practice
231. What might be the problem if you receive a report that your signal through the repeater is distorted or weak?
Your transmitter may be slightly off frequency.
Your batteries may be running low.
You could be in a bad location.
All of these answers are correct:
232. What is one of the reasons to use digital signals instead of analog signals to communicate with another station?
Many digital systems can automatically correct errors caused by noise and interference
233. What are phone transmissions?
Voice transmissions by radio

Are You Smarter Than A Technician?

Here's how you play: Politely ask an adult ham if they would be willing to play "Are You Smarter Than A Technician?" by answering one question from the Technician class question pool. Ask them the question and record their call sign and whether they got it correct. Then, bring this sheet back to the ARRL Youth Lounge to get another sheet of questions. Each question is worth one point. Good luck!

234. Which of the following is a form of amplitude modulation?

[Single sideband](#)

235. What name is given to an amateur radio station that is used to connect other amateur stations to the Internet?

[A gateway](#)

236. Which type of voice modulation is most often used for long distance and weak signal contacts on the VHF and UHF bands?

[SSB](#)

237. Which type of modulation is most commonly used for VHF and UHF voice repeaters?

[FM](#)

238. Which emission type has the narrowest bandwidth?

[CW](#)

239. Which sideband is normally used for VHF and UHF SSB communications?

[Upper sideband](#)

240. What is the primary advantage of single sideband over FM for voice transmissions?

[SSB signals use much less bandwidth than FM signals](#)

241. What is the approximate bandwidth of a single-sideband voice signal?

[Between 2 and 3 kHz](#)

242. What is the approximate bandwidth of a frequency-modulated voice signal?

[Between 5 and 15 kHz](#)

243. What is the normal bandwidth required for a conventional fast-scan TV transmission using combined video and audio on the 70-centimeter band?

[About 6 MHz](#)

244. How is information transmitted between stations using Echolink?

[Internet](#)

245. What does the abbreviation IRLP mean?

[Internet Radio Linking Project](#)

246. Who may operate on the Echolink system?

[Any licensed amateur radio operator](#)

247. What technology do Echolink and IRLP have in common?

[Voice over Internet protocol](#)

248. What method is used to transfer data by IRLP?

[Voice over Internet protocol](#)

249. What does the term IRLP describe?

[A method of linking between two or more amateur stations using the Internet](#)

250. Which one of the following allows computer-to-radio linking for voice transmission?

[EchoLink](#)

What are you listening to if you hear a brief tone and then a station from Russia calling CQ on a 2-meter repeater?

[An Internet linked DX station](#)

Are You Smarter Than A Technician?

Here's how you play: Politely ask an adult ham if they would be willing to play "Are You Smarter Than A Technician?" by answering one question from the Technician class question pool. Ask them the question and record their call sign and whether they got it correct. Then, bring this sheet back to the ARRL Youth Lounge to get another sheet of questions. Each question is worth one point. Good luck!

251. Where might you find a list of active nodes using VoIP?
[A repeater directory or the Internet](#)
252. When using a portable transceiver how do you select a specific IRLP node?
[Use the keypad to transmit the IRLP node numbers](#)
253. Which of the following is an example of a digital communications method?
[Packet radio](#)
254. What does the term APRS mean?
[Automatic Position Reporting System](#)
255. What item is required along with your normal radio for sending automatic location reports?
[A global positioning system receiver](#)
256. What type of transmission is indicated by the term NTSC?
[A standard fast scan color television signal](#)
257. What emission mode may be used by a Technician class operator in the 219 - 220 MHz frequency range?
[Point-to-point digital message forwarding](#)
258. What does the abbreviation PSK mean?
[Phase Shift Keying](#)
259. What is PSK31?
[A low-rate data transmission mode that works well in noisy conditions](#)
260. What sending speed is recommended when using Morse code?
[Any speed at which you can reliably receive](#)
261. What is a practical reason for being able to copy CW when using repeaters?
[To recognize a repeater ID sent in Morse code](#)
262. What is the "Q" signal used to indicate that you are receiving interference from other stations?
[QRM](#)
263. What is the "Q" signal used to indicate that you are changing frequency?
[QSY](#)
264. What is a good thing to have when operating a hand-held transceiver away from home?
[One or more fully charged spare battery packs](#)
265. Which of these items would probably not be very useful to include in an emergency response kit?
[A 1500 watt output linear amplifier](#)
266. How can you make the signal from a hand-held radio stronger when operating in the field?
[Use an external antenna instead of the rubber-duck antenna](#)
267. What would be a good thing to have when operating from a location that includes lots of crowd noise?
[A combination headset and microphone](#)
268. What is a method used to locate sources of noise interference or jamming?
[Radio direction finding](#)

Are You Smarter Than A Technician?

Here's how you play: Politely ask an adult ham if they would be willing to play "Are You Smarter Than A Technician?" by answering one question from the Technician class question pool. Ask them the question and record their call sign and whether they got it correct. Then, bring this sheet back to the ARRL Youth Lounge to get another sheet of questions. Each question is worth one point. Good luck!

269. Which of these items would be the most useful for a hidden transmitter hunt?
A directional antenna
270. What is a popular operating activity that involves contacting as many stations as possible during a specified period of time?
Contesting
271. What is a grid locator?
A letter-number designator assigned to a geographic location
272. What is a special event station?
A temporary station that operates in conjunction with an activity of special significance
273. What is the maximum power allowed when transmitting telecommand signals to radio controlled models?
1 watt
274. What is the station identification requirement when sending commands to a radio control model using amateur frequencies?
A label indicating the licensee's call sign and address must be affixed to the transmitter
275. What class of license is required to use amateur satellites?
Any amateur whose license allows them to transmit on the satellite uplink frequency
276. How much power should you use to transmit when using an amateur satellite?
The minimum amount of power needed to complete the contact
277. What is something you can do when using an amateur radio satellite?
Talk to amateur radio operators in other countries
278. Who may make contact with an astronaut on the International Space Station using amateur radio frequencies?
Any amateur with a Technician or higher class license
279. What is a satellite beacon?
A signal that contains information about a satellite
280. What should you use to determine when you can access an amateur satellite?
A satellite tracking program
281. What is Doppler shift?
A change in signal frequency caused by motion through space
282. What is the name of the group that coordinates the building and/or launch of the largest number of amateur radio satellites?
AMSAT
283. What is a satellite sub-band?
A portion of a band where satellite operations are permitted
284. What is the satellite sub-band on 70-CM?
435 to 438 MHz
285. What do the initials LEO tell you about an amateur satellite?
The satellite is in a Low Earth Orbit
286. What information is included in an FCC declaration of a temporary state of communication emergency?
Any special conditions and rules to be observed during the emergency

Are You Smarter Than A Technician?

Here's how you play: Politely ask an adult ham if they would be willing to play "Are You Smarter Than A Technician?" by answering one question from the Technician class question pool. Ask them the question and record their call sign and whether they got it correct. Then, bring this sheet back to the ARRL Youth Lounge to get another sheet of questions. Each question is worth one point. Good luck!

287. Under what conditions are amateur stations allowed to communicate with stations operating in other radio services?

When specially authorized by the FCC, or in an actual emergency

288. What should you do if you are in contact with another station and an emergency call is heard?

Stop your contact immediately and take the emergency call

289. What are the restrictions on amateur radio communications after the FCC has declared a communications emergency?

You must avoid those frequencies dedicated to supporting the emergency unless you are participating in the relief effort

290. What is one reason for using tactical call signs such as "command post" or "weather center" during an emergency?

They are more efficient and help coordinate public-service communications

291. What is legally required to restrict a frequency to emergency-only communication?

An FCC declaration of a communications emergency

292. Who has the exclusive use of a frequency if the FCC has not declared a communication emergency?

No station has exclusive use in this circumstance

293. What should you do if you hear someone reporting an emergency?

Assume the emergency is real and act accordingly

294. What is an appropriate way to initiate an emergency call on amateur radio?

Say "Mayday, Mayday, Mayday" followed by "any station come in please" and identify your station

295. What are the penalties for making a false emergency call?

You could have your license revoked.

You could be fined a large sum of money.

You could be sent to prison.

All of these answers are correct:

296. What type of communications has priority at all times in the Amateur Radio Service?

Emergency communications

297. When must priority be given to stations providing emergency communications?

At all times and on all frequencies.

298. What can you do to be prepared for an emergency situation where your assistance might be needed?

Check at least twice a year to make sure you have all of your emergency response equipment and know where it is.

Make sure you have a way to run your equipment if there is a power failure in your area.

Participate in drills that test your ability to set up and operate in the field.

All of these answers are correct:

299. When may you use your amateur station to transmit a "SOS" or "MAYDAY" signal?

When there is immediate threat to human life or property

300. What is the primary function of RACES in relation to emergency activities?

RACES organizations are restricted to serving local, state, and federal government emergency management agencies

301. What is the primary function of ARES in relation to emergency activities?

ARES supports agencies like the Red Cross, Salvation Army, and National Weather Service

302. What organization must you register with before you can participate in RACES activities?

The responsible civil defense organization

Are You Smarter Than A Technician?

Here's how you play: Politely ask an adult ham if they would be willing to play "Are You Smarter Than A Technician?" by answering one question from the Technician class question pool. Ask them the question and record their call sign and whether they got it correct. Then, bring this sheet back to the ARRL Youth Lounge to get another sheet of questions. Each question is worth one point. Good luck!

303. What is necessary before you can join an ARES group?

You must have an amateur radio license

304. What could be used as an alternate source of power to operate radio equipment during emergencies?

The battery in a car or truck.

A bicycle generator.

A portable solar panel.

All of these answers are correct:

305. When can you use non-amateur frequencies or equipment to call for help in a situation involving immediate danger to life or property?

In a genuine emergency you may use any means at your disposal to call for help on any frequency

306. Why should casual conversation between stations during a public service event be avoided?

Idle chatter may interfere with important traffic

307. What should you do if a reporter asks to use your amateur radio transceiver to make a news report?

Advise them that the FCC prohibits such use

308. When can you use a modified amateur radio transceiver to transmit on the local fire department frequency?

In a genuine emergency you may use any means at your disposal to call for help on any frequency

309. Which type of traffic has the highest priority?

Emergency traffic

310. What type of messages should not be transmitted over amateur radio frequencies during emergencies?

Personal information concerning victims

311. What should you do to minimize disruptions to an emergency traffic net once you have checked in?

Do not transmit on the net frequency until asked to do so by the net control station

312. What is one thing that must be included when passing emergency messages?

The name of the person originating the message

313. What is one way to reduce the chances of casual listeners overhearing sensitive emergency traffic?

Pass messages using a non-voice mode such as packet radio or Morse code

314. What is of primary importance for a net control station?

A strong and clear signal

315. What should the net control station do if someone breaks in with emergency traffic?

Stop all net activity until the emergency has been handled

316. What should you do if a large scale emergency has just occurred and no net control station is available?

Open the emergency net immediately and ask for check-ins

317. What is the preamble of a message?

The information needed to track the message as it passes through the amateur radio traffic handling system

318. What is meant by the term "check" in reference to a message?

The check is a count of the number of words in the message

319. What is the recommended guideline for the maximum number of words to be included in the text of an emergency message?

25 words

Are You Smarter Than A Technician?

Here's how you play: Politely ask an adult ham if they would be willing to play "Are You Smarter Than A Technician?" by answering one question from the Technician class question pool. Ask them the question and record their call sign and whether they got it correct. Then, bring this sheet back to the ARRL Youth Lounge to get another sheet of questions. Each question is worth one point. Good luck!

320. What is a beam antenna?
An antenna that concentrates signals in one direction
321. What is an antenna that consists of a single element mounted perpendicular to the Earth's surface?
A vertical antenna
322. What type of antenna is a simple dipole mounted so the elements are parallel to the Earth's surface?
A horizontal antenna
323. What is a disadvantage of the "rubber duck" antenna supplied with most hand held radio transceivers?
It does not transmit or receive as effectively as a full sized antenna
324. How does the physical size of half-wave dipole antenna change with operating frequency?
It becomes shorter as the frequency increases
325. What is the advantage of 5/8 wavelength over 1/4 wavelength vertical antennas?
Their radiation pattern concentrates energy at lower angles
326. What is the primary purpose of a dummy load?
It does not radiate interfering signals when making tests
327. What type of antennas are the quad, Yagi, and dish?
Directional or beam antennas
328. What is one type of antenna that offers good efficiency when operating mobile and can be easily installed or removed?
A magnet mount vertical antenna
329. What is a good reason not to use a "rubber duck" antenna inside your car?
Signals can be 10 to 20 times weaker than when you are outside of the vehicle
330. What is the approximate length, in inches, of a quarter-wavelength vertical antenna for 146 MHz?
19 inches
331. What is the approximate length, in inches, of a 6-meter 1/2 wavelength wire dipole antenna?
112 inches
332. Why are VHF/UHF signals not normally heard over long distances?
VHF and UHF signals are usually not reflected by the ionosphere
333. What might be happening when we hear a VHF signal from long distances?
A possible cause is sporadic E reflection from a layer in the ionosphere
334. What is the most likely cause of sudden bursts of tones or fragments of different conversations that interfere with VHF or UHF signals?
Strong signals are overloading the receiver and causing undesired signals to be heard
335. What is the radio horizon?
The point where radio signals between two points are blocked by the curvature of the Earth
336. What should you do if a station reports that your signals were strong just a moment ago, but now they are weak or distorted?
Try moving a few feet, random reflections may be causing multi-path distortion.

Are You Smarter Than A Technician?

Here's how you play: Politely ask an adult ham if they would be willing to play "Are You Smarter Than A Technician?" by answering one question from the Technician class question pool. Ask them the question and record their call sign and whether they got it correct. Then, bring this sheet back to the ARRL Youth Lounge to get another sheet of questions. Each question is worth one point. Good luck!

337. Why do UHF signals often work better inside of buildings than VHF signals?
The shorter wavelength of UHF signals allows them to more easily penetrate urban areas and buildings
338. What is a good thing to remember when using your hand-held VHF or UHF radio to reach a distant repeater?
Keep the antenna as close to vertical as you can
339. What can happen if the antennas at opposite ends of a VHF or UHF line of sight radio link are not using the same polarization?
Signals could be as much as 100 times weaker
340. What might be a way to reach a distant repeater if buildings or obstructions are blocking the direct line of sight path?
Try using a directional antenna to find a path that reflects signals to the repeater
341. What term is commonly used to describe the rapid fluttering sound sometimes heard from mobile stations that are moving while transmitting?
Picket fencing
342. Why do VHF and UHF Radio signals usually travel about a third farther than the visual line of sight distance between 2 stations?
The Earth seems less curved to radio waves than to light.
343. Why is the outer sheath of most coaxial cables black in color?
Black provides protection against ultraviolet damage
344. What, in general terms, is standing wave ratio (SWR)?
A measure of how well a load is matched to a transmitter
345. What is the impedance of the most commonly used coaxial cable in typical amateur radio installations?
50 Ohms
346. What reading on a SWR meter indicates a perfect impedance match between the antenna and the feed line?
1 to 1
347. What might be indicated by erratic changes in SWR readings?
A loose connection in your antenna or feedline
348. What is the SWR value where the protection circuits in most solid-state transmitters begin to reduce transmitter power?
2 to 1
349. What happens to the power lost in a feed line?
It is converted into heat by losses in the line
350. What instrument other than a SWR meter could you use to determine if your feedline and antenna are properly matched?
Directional wattmeter
351. What is the most common reason for failure of coaxial cables?
Moisture contamination
352. Why is it important to have a low SWR in an antenna system that uses coaxial cable feedline?
To allow the efficient transfer of power and reduce losses
353. What can happen to older coaxial cables that are exposed to weather and sunlight for several years?
Losses can increase dramatically
354. Why is coaxial cable used more often than any other feed line for amateur radio antenna systems?
It is easy to use and requires few special installation considerations

Are You Smarter Than A Technician?

Here's how you play: Politely ask an adult ham if they would be willing to play "Are You Smarter Than A Technician?" by answering one question from the Technician class question pool. Ask them the question and record their call sign and whether they got it correct. Then, bring this sheet back to the ARRL Youth Lounge to get another sheet of questions. Each question is worth one point. Good luck!

355. What is a commonly accepted value for the lowest voltage that can cause a dangerous electric shock?
30 volts
356. What is the lowest amount of electrical current flowing through the human body that is likely to cause death?
100 milliamperes
357. What is connected to the green wire in a three-wire electrical plug?
Ground
358. What is the purpose of a fuse in an electrical circuit?
To interrupt power in case of overload
359. What might happen if you install a 20-ampere fuse in your transceiver in the place of a 5-ampere fuse?
Excessive current could cause a fire
360. What is a good way to guard against electrical shock at your station?
Use 3-wire cords and plugs for all AC powered equipment.
Connect all AC powered station equipment to a common ground.
Use a ground-fault interrupter at each electrical outlet.
All of these answers are correct:
361. What is the most important thing to consider when installing an emergency disconnect switch at your station?
Everyone should know where it is and how to use it
362. What precautions should be taken when a lightning storm is expected?
Disconnect the antenna cables from your station and move them away from your radio equipment.
Unplug all power cords from AC outlets.
Stop using your radio equipment and move to another room until the storm passes.
All of these answers are correct:
363. What is one way to recharge a 12-volt battery if the commercial power is out?
Connect the battery to a car's battery and run the engine
364. What kind of hazard is presented by a conventional 12-volt storage battery?
It contains dangerous acid that can spill and cause injury.
Short circuits can damage wiring and possibly cause a fire.
Explosive gas can collect if not properly vented.
All of these answers are correct:
365. What can happen if a storage battery is charged or discharged too quickly?
The battery could overheat and give off dangerous gas or explode
366. What is the most important reason to have a lightning protection system for your amateur radio station?
Fire prevention
367. What kind of hazard might exist in a power supply when it is turned off and disconnected?
You might receive an electric shock from stored charge in large capacitors
368. Why should you wear a hard hat and safety glasses if you are on the ground helping someone work on an antenna tower?
To protect your head and eyes in case something accidentally falls from the tower
369. What is a good precaution to observe before climbing an antenna tower?
Put on your safety belt and safety glasses

Are You Smarter Than A Technician?

Here's how you play: Politely ask an adult ham if they would be willing to play "Are You Smarter Than A Technician?" by answering one question from the Technician class question pool. Ask them the question and record their call sign and whether they got it correct. Then, bring this sheet back to the ARRL Youth Lounge to get another sheet of questions. Each question is worth one point. Good luck!

370. What should you do before you climb a tower?

- Arrange for a helper or observer.
- Inspect the tower for damage or loose hardware.
- Make sure there are no electrical storms nearby.
- All of these answers are correct:

371. What is an important consideration when putting up an antenna?

- Make sure people cannot accidentally come into contact with it

372. What must be considered when erecting an antenna near an airport?

- The maximum allowed height with regard to nearby airports

373. What is the most important safety precaution to observe when putting up an antenna tower?

- Look for and stay clear of any overhead electrical wires

374. How should the guy wires for an antenna tower be installed?

- In accordance with the tower manufacturer's instructions

375. What is a safe distance from a power line to allow when installing an antenna?

- So that if the antenna falls unexpectedly, no part of it can come closer than 10 feet to the power wires

376. What is the most important safety rule to remember when using a crank-up tower?

- A crank-up tower should never be climbed unless it is in the fully lowered position

377. Why is stainless steel hardware used on many antennas instead of other metals?

- Stainless steel parts are much less likely to corrode

378. What is considered to be an adequate ground for a tower?

- Separate 8 foot long ground rods for each tower leg, bonded to the tower and each other

379. What type of radiation are VHF and UHF radio signals?

- Non-ionizing radiation

380. When can radio waves cause injury to the human body?

- Only if the combination of signal strength and frequency cause excessive power to be absorbed

381. What is the maximum power level that an amateur radio station may use at frequencies above 30 MHz before an RF exposure evaluation is required?

- 50 watts PEP at the antenna

382. What factors affect the RF exposure of people near an amateur transmitter?

- Frequency and power level of the RF field.
- Distance from the antenna to a person.
- Radiation pattern of the antenna.
- All of these answers are correct:

383. Why must the frequency of an RF source be considered when evaluating RF radiation exposure?

- The human body absorbs more RF energy at some frequencies than others

384. How can you determine that your station complies with FCC RF exposure regulations?

- By calculation based on FCC OET Bulletin 65.
- By calculation based on computer modeling.
- By measurement of field strength using calibrated equipment.
- All of these answers are correct:

Are You Smarter Than A Technician?

Here's how you play: Politely ask an adult ham if they would be willing to play "Are You Smarter Than A Technician?" by answering one question from the Technician class question pool. Ask them the question and record their call sign and whether they got it correct. Then, bring this sheet back to the ARRL Youth Lounge to get another sheet of questions. Each question is worth one point. Good luck!

385. What could happen if a person accidentally touched your antenna while you were transmitting?

They might receive a painful RF burn injury

386. What action might amateur operators take to prevent exposure to RF radiation in excess of FCC supplied limits?

Alter antenna patterns.

Relocate antennas.

Change station parameters such as frequency or power.

All of these answers are correct.

387. How can you make sure your station stays in compliance with RF safety regulations?

By re-evaluating the station whenever an item of equipment is changed

388. Which of the following units of measurement is used to measure RF radiation exposure?

Milliwatts per square centimeter

389. Why is duty cycle one of the factors used to determine safe RF radiation exposure levels?

It takes into account the amount of time the transmitter is operating
